

Ethanol and the Impact on Grain Elevators

One only needs to pick up a newspaper or magazine to read about the explosion in corn-based ethanol production. Here in Illinois it is just a matter of looking out the window and realizing there are a lot more acres planted to corn.

This afternoon seminar will focus on both the big picture trends and implications as well as the local impact of expanded corn production. University of Illinois professors Darrel Good and Bob Hauser will team up to provide the background information, analysis and possible implications of various corn production trends for a robust time of discussion.

Topics to be covered include:

- Examination of corn prices and food prices
- Impact on transportation and storage
- Long-run price projections and new price equilibrium
- Cropping patterns locally and internationally
- Implications of disruption in production
- Analysis of international trade

Dates and Locations:

August 13 - Thelma Keller Convention Center - Effingham
August 14 - Mendota Civic Center - Mendota

Agenda:

1:00 - 1:30 PM – Registration
1:30 - 4:00 PM – Meeting
4:00 - 5:00 PM – Networking/social time

We know you enjoy getting together with your peers in the industry to discuss the issues of the day, so plan to stick around and share stories with your friends!

Registration Fee: \$50/member – \$95/non-member – Includes meeting, hors d’oeuvres and drinks
