

## Course Highlights

Engineering Extension is pleased to announce a safety and health training seminar specifically geared for employers and employees in the ethanol industry. The course planners have worked closely with members of the industry to focus on areas of safety and health that relate to OSHA compliance issues with the safe operation of ethanol production facilities.

Significant cost reduction for your business can be achieved by having few lost-time accidents, lower insurance rates, and by providing a safe work environment for your employees. Periodically, all employees need strong reminders of the potential hazards in their work area (which attendance of this course may assist in providing) – and how the proper conformance to OSHA Standards can assist them! Once their awareness is raised, they are more likely to use and conform to OSHA Standards and to remind coworkers to do the same.

### Questions or Additional Information

Engineering Extension  
South Dakota State University  
Box 510, West Hall 118  
Brookings, SD 57007-0597

Phone: (605) 688-4101
